# INDIVIDUAL RECORDS

Official NCAA field hockey statistics began in 1981 and are based on information submitted to the NCAA statistics service by institutions participating in the statistics rankings, and information maintained by the National Field Hockey Coaches Association. In 2020, the season and championship were not held due to the COVID-19 pandemic. In 2021, the minimum for inclusion in the record book for single-season per game categories was set at the number of games that a team had to play to be considered for at-large championship selection (6). In statistical rankings, the rounding of percentages and/or averages may indicate ties where none exists. In these cases, the numerical order of the rankings is accurate. Note that the length of a field hockey match was altered beginning in 2019, with match length shortened from 70 to 60 minutes (four quarters of 15 minutes each). Anyone who played in 2019 and after will have their career averages based on a 60-minute game.

# TEAM RECORDS

Official NCAA field hockey statistics began in 1981 and are based on information submitted to the NCAA statistics service by institutions participating in the statistics rankings, and information maintained by the National Field Hockey Coaches Association. In 2020, the season and championship were not held due to the COVID-19 pandemic. In 2021, the minimum for inclusion in the record book for single-season per game categories was set at the number of games that a team had to play to be considered for at-large championship selection (6). In statistical rankings, the rounding of percentages and/or averages may indicate ties where none exists. In these cases, the numerical order of the rankings is accurate. Note that the length of a field hockey match was altered beginning in 2019, with match length shortened from 70 to 60 minutes (four quarters of 15 minutes each). Anyone who played in 2019 and after will have their career averages based on a 60-minute game.
